Work Experience

Full Stack Software Engineer

Apr 2024 - Present

Freelance | Philadelphia

- Successfully integrate inclusive product design strategies with full stack development methodologies to optimize end-user experience while designing web applications for independent clients.
- Test and deploy servers and software applications for client websites using an extensive range of cutting-edge web technologies including LLMs and AI.
- Work closely with clients to establish application specifications and designs
- Apply and inquisitive mindset to modify and maintain existing projects to correct errors, improve performance and scale applications.
- Leverage professional development opportunities to master full stack software engineering tools and methodologies

Instructor/Mentor

Jun 2020 - Dec 2023

Future Media Academy | Philadelphia

- Mentored international students in electronic music production to foster future industry success.

Electronic Music Producer

May 2008 - Dec 2023

Kabayun - Sangoma Records | Philadelphia

- Created and performed original electronic music in 40+ countries, with 100+ tracks released internationally.
- Demonstrated autonomy in creating and managing my own brand-promoting artist website.
- Oversaw a robust social media following of 100,000+.
- Demonstrated ability to take responsibility in overseeing projects from inception to completion.

Business Analyst

Jan 2015 - Nov 2016

Zoomer, Inc | Philadelphia

- Managed and ensured the accuracy of large SQL datasets, maintaining complex reports and dashboards.
- Utilized Mapbox to create data visualizations for complex insights, aiding executive decisions on market entry and investor attraction as Zoomer grew to a \$20 million valuation, rivaling other RDS startups like DoorDash.
- Managed complex projects with a strong ownership and a consistent track record of meeting deadlines and delivering effective solutions.

Software Engineer/Account Manager

Jan 2010 - Oct 2012

Entourage Yearbooks | Princeton

- Headed a team to develop a .NET/Javascript full stack web app, which included an online store and yearbook management features. This contributed to Entourage becoming the fastest growing yearbook company in the USA at that time.

- Helped integrate Chili Publish, making us the first US online yearbook publisher with comprehensive web-based design software.
- Leveraged end-to-end testing methodologies to ensure seamless compatibility between front-end and back-end systems for improved UX.
- Managed client accounts and facilitated photo book creation using Lumapix Fotofusion's API.

Volunteer Experience

Volunteer

Jun 2020 - Sep 2021

Vamos Juntos

- Provided food aid to South Philadelphia's Latinx community.
